

# REACTION GAME Solder kit

## Assembly instructions

[www.solde.red/333139](http://www.solde.red/333139)

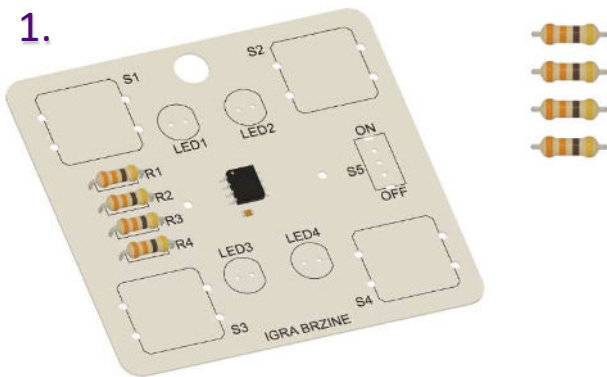

Thank you for buying this product. Make sure the exercise contains all the necessary components as shown in the image to the left. Solder the components following the steps shown in figures 1 to 6.

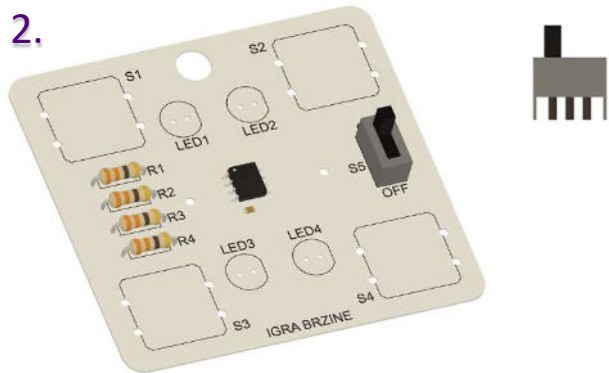

When you have assembled the game, place the battery in the provided holder, turn on the game by setting the S5 switch to the ON position and enjoy. The LEDs will light up in a random order, and your goal is to press the button of the same color as the LED that lit up in the shortest possible time. If you make a mistake with the color or your reaction isn't fast enough, all the LEDs will light up and the game will start over.

Have fun!
